## **Smart Technology Catalog**

### **SmartBrow Portable Access Control System (SPACS)**

The SmartBrow Portable Access Control System (SPACS) is the Maritime sister to the Commercial Portable Access Control System. Specially configured to be used on the brow of a ship or at pier-side, (SPACS) provides a rugged, easy to deploy access control solution. All pricing below includes initial installation & configuration of operating system, database and ISMS software. Configuration will include badge design at the request of the customer. The customer must provide all graphics for badge design. Creation of custom graphics is available at a cost of \$95 per hour.

Configured SPACS will be delivered FOB for final configuration/installation and Subject Matter Expert (SME) training.
